

The diagram illustrates the internal wiring of the LED matrix driver. It features two 7-segment multiplexers, 7SEG_MUX_4 and 7SEG_MUX_3, which are connected to a 4x7 grid of LEDs. The LEDs are labeled D1 through D20. The outputs are labeled OUTB0 through OUTB7. The diagram shows the internal connections between the multiplexers and the LEDs, including the common anode/cathode connections.

[illegible]

The diagram shows the pin connections for two 7-segment displays, U3 and U5, which are 0.8in SMD components. The pins are color-coded: red for power (VCC, GND), green for data (OUT0-OUT7), and blue for control (CA, CB, DP).

U3 Pin Connections:

- OUT0 (Red) to A
- OUT1 (Red) to B
- OUT2 (Red) to C
- OUT3 (Red) to D
- OUT4 (Red) to E
- OUT5 (Red) to F
- OUT6 (Red) to G
- OUT7 (Red) to DP
- CA (Blue) to 1
- CB (Blue) to 6
- DP (Blue) to 6

U5 Pin Connections:

- OUT0 (Red) to A
- OUT1 (Red) to B
- OUT2 (Red) to C
- OUT3 (Red) to D
- OUT4 (Red) to E
- OUT5 (Red) to F
- OUT6 (Red) to G
- OUT7 (Red) to DP
- CA (Blue) to 1
- CB (Blue) to 6
- DP (Blue) to 6

The 7SEG_MUX_1 and 7SEG_MUX_2 signals are connected to the DP pins of U3 and U5, respectively.

Diagram showing the connection of two 7-segment displays, U7 and U8, to a 7SEG_MUX_1 and 7SEG_MUX_2 block.

U7 GS-S2011AB

Display Pin	Segment	Value
OUTB0	A	7
OUTB1	B	6
OUTB2	C	4
OUTB3	D	2
OUTB4	E	1
OUTB5	F	9
OUTB6	G	10
OUTB7	DP	5

U8 GS-S2011AB

Display Pin	Segment	Value
OUTB0	A	7
OUTB1	B	6
OUTB2	C	4
OUTB3	D	2
OUTB4	E	1
OUTB5	F	9
OUTB6	G	10
OUTB7	DP	5

The 7SEG_MUX_1 and 7SEG_MUX_2 blocks are connected to the displays via their 3 and 8 inputs.
